

GIFT Format Explanation with Examples:

The GIFT format allows you to structure questions and answer options, indicating correct answers with 100% and incorrect ones with 0%. You can also enhance quizzes by shuffling answer choices.

In the Customized GIFT format, each question is introduced, followed by its answer options enclosed in curly brackets. The "~%" indicates an answer choice, and the correctness percentage signifies if an option is correct (100%) or incorrect (0%). Adding "S" after the closing bracket signals the system to shuffle answer choices..

Here are some examples of questions in the GIFT format:

Question 1: One Correct Answer (No Shuffle)

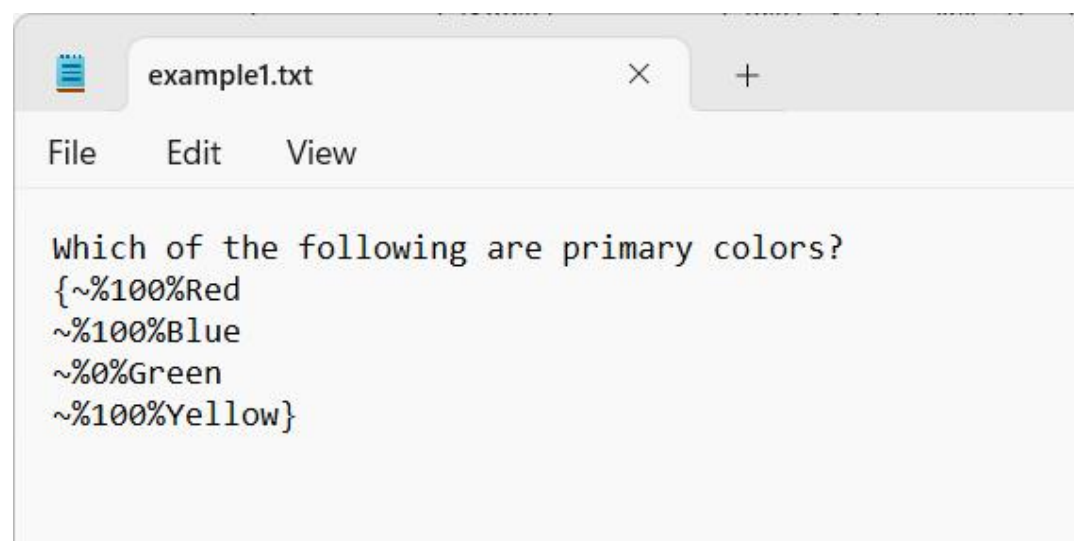

What is the largest planet in our solar system?

```
What is the largest planet in our solar system?
{~%100%Jupiter
